272 are kneaded and pulverized in calabashes filled with water. This produces a grayish-brown, greasy juice which, after the fleshy husks have been fished out and thrown away, reminds one of cacao in appearance and flavor and is extremely filling. This drink tasted even better to me when I added a little sugar. [123] [263] The Indians who tasted this, however, were not enthusiastic about the addition, since they like sugar just as little as salt. I was unable to please either children or adults with my bonbons. The fruit of the bacu buriti, curauá, piaçaba, and ubim palms (see p. 166) is made into beverages in the same way, while that of the inaja palm is cooked beforehand. The juice obtained from this tastes quite insipid, to be sure, but likewise has a high food value.

One should also mention that a drink is prepared from the [114] [184] [197] gathered honey by mixing it with water. I never saw it eaten, as has been confirmed for the Waiká (407) and various /85/ other

407. Zerries, 1956b, p. 150.

tribes of Guiana (408) (409).

408. Koch-Grünberg, 1923a, p. 55.

409. Richard Schomburgk, 1848, II, p. 169.

271 184 As the above account shows, the Surára and Pakidái do not lack variety with regard to beverages, so that only in the rarest instances need they resort to plain water, as is the case, according to Zerries' accounts, among the Waiká (410). As among

273 184

unknown to the Surára and Pakidái too.

/209/

273 The beverage of the Sanemá is water. They do not make
271 alcoholic beverages. In recent times the Sanemá who live in
177 contact with the Makiritare have learned to prepare cashíri, and they are beginning to drink it with some frequency. Nevertheless, the preparation of alcoholic beverages is not common among the Sanemá and Yanoama in general.

252 The greater part of their food is toasted or broiled in the
263 coals. They do not eat salt, properly speaking, but they use
261 wood ashes and peppers. They also clean dry clay and eat it.

276 As stimulants they have tobacco and yopo. They do not smoke, but rather roll up the tobacco leaves, and, after treating them with ashes, they put them in back of the lower lip. The yopo is made with certain leaves and ashes of bark. It seems that they have several kinds, according to the degree of strength. They showed us a gray type and a black one. One who wishes to take a dose puts the intoxicating powder in a tube and a companion blows it into his nose. In general, yopo is re-
[764] lated to religious ideas. It appears that they take it at burial ceremonies when they accompany a deceased person and his "híkula upwards." The theurgists also use it frequently in their various ceremonies. There are known cases in which a man "flew off" with a strong dose of yopo and, losing his way, never came back to earth!

581 The founding of a family is the fervent desire of all the
183 young people of the tribe. We observed a degree of irregularity
591 in the custom of determining the matrimonial residence. In the
184 Sanemá group of the Erebato, this seems to be bilocal, as among the Waica of the upper Orinoco (Barker, 1953, p. 478), while on the Ventuari we noticed a tendency toward unilocality. We
591 are not certain, but it would seem that normal residence is initially
182 matrilocal with postmatrimonial betrothal service and then changes
596 to bilocal. This arrangement brings about the formation of bilocal extended families in Yanoama society.

596 Societies with bilocal extended families are relatively
591 rare, but their existence among the Sanemá does not surprise us if we bear in mind that the economic situation of the tribe lends

/452 cont./

252 Women generally roast the platanos for everyone's breakfast. At noon and in the evening, everyone cooks his own platanos. To a child of seven they might give three green platanos in [866] their skins, telling him: "Here is your dinner." The child then proceeds to cook them.

264 The Guaika /Waica/ in general have abundant food and eat it with pleasure. They do not look kindly upon remains of food being left. Anyone who does not lick his bowl clean after having drunk his soup of platanos is considered a prodigal.

266 765 The mere idea of cannibalism is rejected with horror, although they do eat the pulverized bones of a cremated relative, after having kept them in a hermetically sealed gourd for about six months.

262 They do not eat carnivorous birds and animals, but carnivorous fish, even the caribe (piranha), are eaten with pleasure. Some [252] snakes are eaten, others not. They boil them or else they cook them wrapped in leaves upon the embers.

• 271 Drink, Drugs, and Excesses

The Guaika /Waica/ take extreme care concerning the water they drink. The supply of water for a settlement must be obtained upstream from all the fords which cross the stream or brook. If a Guaika finds it necessary to drink water in a place below a ford, he makes a hole in the sand of the beach and waits until water which has filtered through it gushes up. The water of the current is considered dirty, just as the water from the hole dug [415] in the beach is clean. Water is transported in gourds by the women for use in the settlement.

273 The Guaika do not prepare any alcoholic beverage.

276 Tobacco leaves are rolled up with ashes and placed in the mouth behind the lower lip. When there is a shortage of tobacco, /453/ they obtain a certain bitter root in the forest, strip the bark from it, and place it behind the lip to diminish the desire for tobacco.
